

Misiker Genene

Founder & Developer | CEO of ZemenTech | CEO of Yenestickers | Creator

■ +251973674201 ✉ misikergenene622@gmail.com ■ Arbaminch, Ethiopia

Summary

Results-driven founder and developer, adept at building and launching real-world technology solutions with measurable impact. Successfully developed multiple real-world applications, including Yenestickers, Ahadu Pool, and Med Link, using technology to solve practical problems and improve user experiences. Experienced in website and software development, with a strong foundation in startup strategy, product development, and leadership. Currently working on new projects, including a startup initiative nearing completion and preparing for user launch. Passionate about solving complex problems, creating impactful products, and driving innovation in the technology sector.

Experience

Founder & Developer

May 2026 – Present | Arba Minch, ET, Ethiopia

ZemnTech

Building a startup project called Ahadu Pool, a real-time multiplayer pool gaming platform designed to deliver an engaging and interactive user experience. The project is almost complete and currently being prepared for launch and user adoption.

CEO of ZemenTech

May 2026 – Present | Arba Minch, ET, Ethiopia

ZemnTech

3rd Place Competition Winner project called Medlink. Developed by members of Zemen Tech.

- Managed documentation and compliance requirements for projects.
- Developed the frontend with Next.js

CEO of Yenestickers

Jan 2024 – Present

YeneStickers

Built and managed a student-focused sticker business using online platforms. Handled branding, digital promotion, and customer engagement. Applied marketing strategies to reach university students effectively.

Creator

Jan 2025 – Present

Campus Find (Lost & Found Web App)

Developed a campus-focused web application to centralize lost and found item reporting. Reduced reliance on scattered Telegram posts by offering a single organized platform. Combined marketing, user research, and software development skills to solve a real student problem.

Education

Software Engineering – BSc

Arbaminch University

2023 – 2028 | Arbaminch, Ethiopia

Harvard CS50x – Introduction to Computer Science

Harvard University

Accomplishments

- Built and deployed 3+ real-world technology applications — Yenestickes, Ahadu Pool, and Med Link — focused on solving practical problems through software solutions.
- Successfully completed CS50x (Harvard University's Introduction to Computer Science), strengthening my foundation in programming, algorithms, and software engineering.
- Continuously improving skills through building products, solving real-world problems, and applying software engineering practices.

Interests

- Learning about software engineering, cybersecurity, and emerging technologies.
- Reading books on psychology, philosophy, and personal development to improve critical thinking and decision-making.
- Playing chess to strengthen strategic thinking, problem-solving, and patience.
- Exploring financial markets and developing analytical skills through trading studies.
- Spending time with friends, building meaningful connections, and sharing ideas.
